Requirements

Description of Problem:
The company "Lua Store" is a baby clothing store that seeks to have a website to offer the products and reach more people.
The owner of the company wants the website to have a good design, that it's complete and at the same time easy to use for their customers.

Solution:
Creation of a tool with the ability to quickly and effectively manage sales of baby items, following the basic CRUD concept. Allowing user control and management, providing access from any device.

Background
Develop a web application for the sale of baby clothes, using programming languages such as html and css for design and java script for functionalities. Based on the CRUD function for data management.

Requirements
The owner of company "Lua Store" wishes to display the following information on the web page:
- Company name
- Company history
- Company location
- The products offered with the prices and photos
- Contacts to buy a product
- Online Shopping Cart
